Professional Services for Propel PLM

When delivered by Domain Systems Professional Services, Propel PLM provides a wider range of features and benefits that are key for successfully producing tomorrow's medical devices.

Improve Medical Device Quality with PLM

Product lifecycle management (PLM) solutions make automating routine quality processes easier and more efficient. Propel software brings together quality, compliance, and product in a single platform.

Scalable

Whether your team is in its start-up phase or an established enterprise, you can automate product quality across the value chain:

- **Buy into the vision**- Data should be real time accessible via a network-based platform so you can end
- **Share the vision**- with a solution that includes R&D, production operations, supply chain, and customer service because they are all part of the quality lifecycle.
- **Integrated solution**- when quality management and product data are integrated your team can work from a single source of truth. Propel makes it easy to view product data, engineering change, and quality control.

Why Propel for MedTech?

Propel PLM manages and centralizes the full product life cycle. Propel connects supplier's product data, and quality.

Supply chains are juggling availability issues, offshoring, and increasing product costs. Propel securely shares product and quality data with suppliers for quick product and supply chain issues and minimizes the risk of noncompliance.

Product life cycle

Control Design Data, Manage Engineering Change and Product Registrations.

Easily manage BOM, change management, documents, and CAD data via seamless product life cycle rom design to new product launch

Quality:

Resolve Customer Complaints and QA Investigations for Product Safety.

Built-in processes to streamline complaints from intake and investigation to resolutions and regulatory requirements. Even helps the customer care process, where service representatives can review previous complaints for issues and can view photos of devices.

Compliance:

Comply with Regulatory Mandates and Manage Audit Trails.

Propel PLM provides full document traceability and workflows to maintain compliance with ISO 9000 quality standards.   Easily track procedures, training plans, preventive maintenance, non-conformance audit tracking and reporting.

Propel PLM for MedTech

For manufacturers in the MedTech space, improving quality assurance boosts patient safety, effectiveness and user experiences. The organization can expect to reduce service costs, speed product launches and spend less effort to achieve compliance.

Potential Propel PLM benefits include:

- Resolving quality-related issues happens 25% faster.
- Reduce service costs.
- Achieve and maintain compliance with a global market.
- Accelerate new product launches by 30%.

Why Domain Systems and Propel?

Maximizing the value of product lifecycle management requires a level of expertise that most businesses simply do not have in-house.

Domain Systems fills these knowledge gaps. We can help you easily achieve a greater return on investment with end-to-end professional services, consulting, and hands-on application support.

Got questions about your project? We can help you.
