Agile–SiliconExpert Adapter

Advanced Tools for **Oracle Agile**

- Point-to-point integration between Oracle Agile and SiliconExpert[1]
- Provides Agile users with access and visibility into the SiliconExpert manufacturing part database
- Improves supply risk management and regulatory compliance
- Lifetime support

Integrating Oracle Agile with Domain Systems' adapters maximizes the PLM investment return. It gives users better visibility, timely access to information and improves productivity.
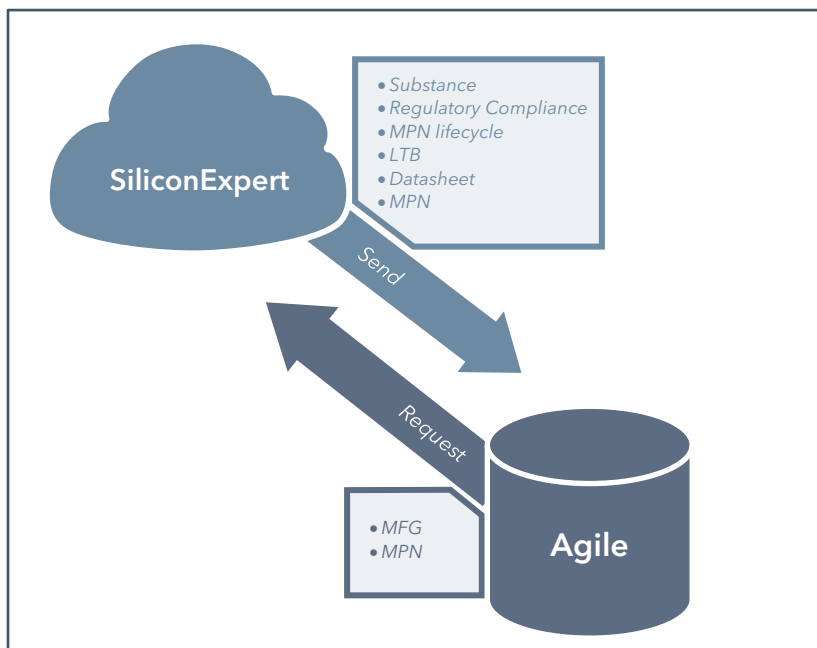

Overview

Domain Systems developed the Agile-SiliconExpert Adapter to help businesses more easily comply with part regulations and improve supply risk management. It is a point-to-point integration that enables the exchange of manufacture/manufacturer part information from SiliconExpert to Agile.

[1]Active SiliconExpert subscription is required.

Functionality

The Agile-SiliconExpert Adapter can be executed manually and/or

scheduled to run automatically.

SiliconExpert

- *Substance*
- *Regulatory Compliance*
- *MPN lifecycle*
- *LTB*
- *Datasheet*
- *MPN*

Send

Request

- *MFG*
- *MPN*

Agile

Agile-SiliconExpert Adapter helps users to determine 'a grade' (or score) for purchased part availability.

Process

The adapter references the Mfgr/MPN part combination in Agile

against the SiliconExpert database, then returns and populates the

appropriate fields within the Agile platform (unless no change has

occurred since last run process).
